

ADVENTUREWORKS BUSINESS PERFORMANCE DASHBOARD

BY
FATHIAH OLAJUMOKE LAWAL

A complete analytics pipeline (SQL → Excel → DAX → Dashboard) built to uncover revenue drivers, profit leaks, customer behaviors, territory performance, and seasonal patterns.

GOAL

- 
- 
- Provide actionable insights that improve pricing, operations, and marketing decisions.

AdventureWorks Business Performance Overview

AdventureWork Business Performance Dashboard

PROFIT LEAKS + CUSTOMER VALUE

1. Discounts Are Reducing Profit Without Increasing Volume

- High discount levels lead to revenue loss
- Discounted items do not sell more units
- Margin erosion with no volume benefit

Action

- Stop blanket discounts
- Move to targeted, performance-based discounts.

2. Individuals Are More Profitable Than Stores

- Individuals generate higher revenue and profit per customer
- Stores/resellers benefit from large discounts that reduce profitability

Action

- Reassess reseller incentives
- Invest more in direct-to-customer retention.

PROFITABILITY MARGIN

3. Mountain Bikes Outperform Road Bikes in Profit

- Road Bikes = higher revenue
- Mountain Bikes = higher profit (better margin)

Why this matters:

Revenue $\neq$ profitability. Pricing and cost-control strategies must differ across categories.

Action:

- Reduce discounting on Road Bikes
- Expand marketing and inventory for Mountain Bikes
- Review COGS structure for Road Bikes

TERRITORY & FREIGHT IMPACT

4. Australia Leads Because of Lower Freight Costs

- Lower freight → more competitive pricing → higher demand
- Freight cost is a major driver of territory performance

Action:

- Negotiate freight contracts
- Introduce regional shipping surcharges
- Consider localized distribution for high-cost regions

5. Strong Seasonal Trend: Q1 Is the Peak Buying Season

- Bicycles, accessories, and clothing spike in Q1
- Sales drop gradually Q2–Q4

Actions:

- Build inventory 1–2 months before Q1
- Launch early-year campaigns
- Offer off-season bundles and upgrades
